start,end,text
530,5030, Type 1 is if you just total plebes
5030,8730, you're earthlings, you know, technology like we do.
9250,12050, Type 2 is you figure out how to
12050,15790, harness the power of a star, an entire
15790,16350, star.
17610,19530, You just surround it with this sphere and
19530,20610, you just soak it all up.
22790,27910, Type 3 civilization is a civilization with the
27910,31790, technological capability to harness the power of an
31790,32930, entire galaxy.
35550,41350, Honestly though it's like, it's not, okay, this
41350,44710, isn't the Kardashian scale where it's like do
44710,50370, you have the technological abilities to harness different
50370,52650, class of ass before you get tired.
54310,58010, We're talking about nuclear energy here, fission.
60670,64390, Type 3 galaxy, it's crazy.
65490,67350, I don't even know how that would work.
68470,73610, Imagine just like a giant shell and it's
73610,77590, so super massive that all these dumbass fucking
77590,81410, planets over here on earth are like, there's

81410,84550, gotta be dark matter because we just don't
84550,85490, fucking see it.
86510,89010, Where's all this dark, where's all this dark
89010,89990, matter coming from?
90970,94130, Well, if there were type 3 civilizations out
94130,98890, there, uh, we wouldn't fucking see them.
105380,106430, Would be?
107910,110490, What would it take to actually harness the
110490,111610, power of a galaxy?
115340,119420, Time Machine for Peace though postulates that the
119420,122200, only way for us to overcome the boundaries
122200,128979, of time to free ourselves from the malignant
128979,134980, uselessness of our existence is to become a
134980,139360, type 4 civilization where we harness the power
139360,142240, of an entire universe, entire visible universe.
143420,145800, Um, what would that look like?
147020,147880, Spoiler alert.
150220,152800, Well, I don't have an answer to that.
153020,153840, What would that look like?
153940,156500, I think it would look like a giant
156500,160000, universal, extra-universal sentient being sprouting into
existence,
160340,162640, but that's a different conversation.
162840,163220, Anyways.
167100,169560, Fuck, I'm tired.
170560,173520, I realized I didn't do a pp log
173520,176820, this week, so I gotta catch up on
176820,178120, that because it's already Tuesday.
178780,182040, Making good progress on the business plan, almost
182040,182540, there.
182760,185280, It would be nice to jump up a
185280,191020, quick YouTube subscribership as social proof before actually
191020,191820, approaching lenders.
193200,199020, But like anything, my goal is only ever
199020,206000, to just cut to the chase.
206620,209320, Just straight to business, let's make a deal.
210360,213580, Like, no flirting, no questions, just here I
213580,213800, am.
216440,217700, Goddamn, I'm tired.
222200,226360, Definitely officially taking an extended break from legal
226360,226960, alcohol.
229120,231900, It's not good for me in general because
231900,234520, I have brain problems, spicy brain.
235780,238240, But it's just, alcohol is super destructive.
239560,243440, I have so far three social contracts in
243440,248640, place where if I'm caught drinking before I
248640,253740, break the contract, then the person is instructed
253740,257040, explicitly to slap me in the face as
257040,258300, hard as they can.
259779,264400, They've been instructed to break skin, like a

264400,266040, bear mauling, that kind of thing.
266200,267720, That kind of force and violence.
269460,270800, So, I'm good.
271800,274000, I love lemonade though, I just invented a
274000,274680, new beverage.
276500,277820, Let me see if I can get you
277820,278680, a peek of that.
279200,279820, Oh, see that?
282460,284880, This is limeade, it's not lemonade, but it
284880,286780, looks like lemonade because it's orange.
286780,289780, This is limeade and orange juice together.
290780,292240, Ah, so good.
294880,298040, I don't even need coffee, I just need
298040,299260, my orange lime.
301080,307040, In recent news, apparently scientists are finding, or
307040,311520, concluding, publishing, that they've found evidence of a
311520,313580, shit ton of Dyson spheres out there.
313580,315260, That's pretty cool.
315740,322440, So, the Dyson sphere is, it postulates, the
322440,325560, idea postulates that, I don't know enough to
325560,328180, actually do this justice, but I can at
328180,328960, least give you a rundown.
329080,332620, There's this scale, it's like, if you're a
332620,336460, type one on the scale, it means you
336460,339500, have the abilities to harness the power of
339500,340340, a single star.
343580,344500, Is that how it works?
351490,352270, Oh, okay.
353110,354850, I need to do a video log, so
354850,355510, that's what I'm doing.
355670,357570, I thought I'd make a segue with the
357570,359310, interesting science stuff.
359610,359990, Dyson.
363350,365730, Kardashev's scale, not Kardashian's scale.
370710,375750, Although, the power of massive bodies, it is
375750,376830, a thing to be harnessed.
376830,378910, The sun, it burns so brightly.
379270,381770, The galaxy, it burns so brightly.
382730,385910, On the order of, what, 100 billion suns,
386050,389290, stars per galaxy, just on average.
390170,392930, Roughly interesting, on the order of the number
392930,396150, of neurons in a human brain.
399530,400210, Crazy.
400210,400350, Crazy.
402830,406110, Oh, and then approximately the number of, what,
407350,409770, galaxies in our invisible universe.
410010,411010, Something like 100 billion.
411570,412050, Is that it?
412970,414030, Somebody can correct me.
414490,417910, I just woke up and I'm drinking lime

417910,418310, orange.
422990,424730, Yeah, finish that business plan.
427570,428630, That's pretty much done.
432130,436510, I have to be sure to make it
436510,443940, clear that my value comes from the brand
443940,447780, that I'm building, not my abilities or my
447780,453120, assets or the world piece computer.
454320,457200, The product and service lines, that stuff, that
457200,462720, will be super epic, but that's not, they'll
462720,465960, only be epic if I can establish a
465960,469660, brand, my brand, or the brand.
470600,473500, Time Machine for Peace, Social Invention Program, World
473500,475740, Piece Computer, the universal piece Computer, the universal
475740,482160, piece, world piecess, The Human Imperative, Computational
Global
482160,482820, Peace System.
484380,487960, Those are all trademark concepts, by the way.
488930,491940, Service marks too, but it depends on the
491940,492330, context.
494520,499700, I do produce goods and services that I
499700,505620, have been marking with those symbols for quite
505620,506160, some time.
507630,510000, They're not registered, but you don't actually need
510000,513580, to register a mark for it to be
513580,517679, recognized at the federal or state level as
517679,525080, a protectable, like as a label for a
525080,525800, good or service.
527840,531540, Once they establish that label, they reserve the
531540,534140, right, they maintain the right to exclude others
534140,537380, from operating with that same label, from producing
537380,539380, goods and services with that same label, from
539380,540380, forging that shit.
541180,544380, And the reason for that is it's intellectual
544380,546420, property, it's brand protection.
549820,554580, If the market were flooded with Folklies, then
554580,558360, nobody would buy Oakleys, because how could you
558360,559200, tell the difference?
560240,560680, Protection.
563420,567180, Anyways, keeping the business plan simple, but I'm
567180,572680, still trying to hit large with the introduction,
573840,582900, where I'm saying, hey, trying to establish business
582900,587660, in Alaska, it's this broad spectrum invention program,
588260,591940, concept that I call a world piece computer,
593520,596380, ideas to produce goods and services, export them
596380,599600, from the state, and then ultimately the only
599600,601400, way to do that is to establish a
601400,606200, market, create a new industry, create the need,
607100,608260, establish the demand.
611960,614600, And that's what I'm doing, and I could
614600,620360, use, though, a jumpstart in the local residential

620360,627340, leasing real estate business, investment property, investment real
627340,627720, estate.
628780,631360, And I live in this property that's for
631360,633380, sale, and I want to buy it, because
633380,638160, I think it will be lucrative, and also
638160,645200, it'll be a great headquarters for the invention
645200,648940, program, a research and development retreat, a place
648940,656080, to serve as an initial attraction within the
656080,660520, state of Alaska, particularly Anchorage, Alaska, and invite
660520,662880, people from out of state, invite people from
662880,667200, in state to just come meet, let's talk
667200,671460, about what we can do as individuals, moving
671460,674940, side by side, making our own moves.
676280,684920, So, yeah, it's kind of a lot, but
684920,687720, I definitely am making a point to maintain
687720,695660, my artistic style, brand, try to keep it
695660,699860, epic but practical at the same time, and
699860,706320, then the formatting has come out nicely, I
706320,708740, think it has a nice aesthetic, which is
708740,710660, important, it's part of the art side.
714340,715840, But, fuck, I don't know what I'm doing.
717040,725280, I could use some help, but there's not
725280,732500, much about life that actually demands you know
732500,733160, what you're doing.
733680,736240, Unless you're engineering a bridge, well, that would
736240,739160, help, but you just don't need to know
739160,741560, what you're doing to do that.
741560,742800, If you get a bunch of people killed
742800,746880, because you engineer a bad bridge, well, consequences,
747740,752880, actions, none of that is predicated on actually
752880,755780, knowing what you're doing, and actually that's why
755780,759260, we have standards boards and laws and regulations,
759700,763140, but, wow, that was a tangent.
764640,765140, Interesting.
767760,768400, Noted.
772260,773520, This is good.
773980,779880, Sometimes I like to do a double lemonade
779880,784120, with orange juice, or I'll do like a
784120,787520, strawberry lemonade with orange juice, or I'll do
787520,793400, a limeade lemonade combo attack, or I'll do
793400,798560, a strawberry lemonade, double strawberry lemonade combo
attack,
798560,802680, or that's just a one-two punch, or
802680,806200, I'll do a limeade strawberry lemonade, or I'll
806200,807560, do sometimes a...
808340,810860, I like getting the big ass grapefruit juices
810860,814140, and then mixing that with lemonade.
817160,819900, I don't usually mix grapefruit and orange juice
819900,824400, though, and I have to minimize the amount

824400,826560, of grapefruit juice I drink because apparently it's
826560,832940, bad for the lithium, but I love the
832940,841110, lemons, the limes, the oranges, the grapefruits, anything
841110,841930, with a rind.
842750,843990, I'm here for that.
846530,847990, The rind.
849870,853010, My brain is just exploring rind puns right
853010,853290, now.
854790,855330, Rind.
857290,858050, Rind.
858910,861070, It's a different rind of thing, you know?
866020,866560, Rind.
869930,870590, Rind.
873310,876010, Which one rinds highest?
878390,880070, I would definitely say the lemon.
882870,886310, The rinder of all rind fruits.
886630,887150, The lemon.
888350,889790, Oranges are so pedestrian.
891650,892410, Grapefruits...
894430,897090, You can't run the world on grapefruit juice.
899790,900510, Limes...
901290,903290, They're just so...
905250,905970, Acerbic?
907490,911790, They have more of a caustic taste to
911790,916290, them, whereas the lemon is kind of...
916990,918450, It seems like it's high acidity.
918450,919590, I feel like the lime...
919990,923050, If you were to split the pH spectrum
923050,926030, between a lemon and a lime, I think
926030,928250, you'd probably find that the lime is way
928250,930630, more basic than the lemon, which is more
930630,931010, acidic.
932470,934410, And so you can't run the world on
934410,934830, limes.
936490,937870, Oranges are so pedestrian.
938770,942110, Who's gonna rind on high?
942730,944530, That would be the lemon, I argue.
948550,949250, Cheers.
949770,951330, Actually, I don't have a lemon in this
951330,951670, cup.
955890,956810, That's good.
960350,961050, So...
961050,961930, Update.
963410,964910, Almost finished with the business plan.
965930,967770, I'm working in conjunction also.
968570,971430, So I focus on the token launch with
971430,971780, Interlock.
974570,976350, That's gonna be fucking huge.
976350,978050, That's gonna be a lot of work.
979090,982330, Practical reality of it is, we may think

982330,984370, we have it just ready to pop off,
984490,987170, but it's gonna be a couple weeks of
987170,990770, just straight attention demands.
991950,993550, And I hope it pays off.
994510,995410, What else?
996630,999990, Pretty much met my requirements to satisfy my
999990,1000690, obligations.
1004130,1004610, Uh...
1005450,1007070, Hiking, jogging regularly.
1007430,1009050, I need to do some more lifts, though.
1009130,1010190, I haven't been lifting enough.
1012110,1014490, You sleep better with a good lift.
1014690,1018050, Also, I feel like you get, as a
1018050,1020470, guy at least, you get more testosterone and
1020470,1021990, just more energy.
1023250,1025609, I could use a little energy burst.
1028650,1032089, I can casually deadlift 300 pounds.
1034710,1036109, So that's my metric.
1036390,1038530, If I can't do that, then I definitely
1038530,1040290, need to lift harder, more.
1040550,1043930, But I'm maintaining my minimums.
1044869,1047830, 300 pounds is light, in terms of the
1047830,1048630, grand scheme of things.
1048750,1051050, That's about as much as I care to
1051050,1054650, lift for the deadlift, just for the purpose
1054650,1055590, of avoiding the pain.
1055590,1058170, Avoiding injury, because it's a notorious lift for
1058170,1062910, tearing shoulder pieces and just fucking yourself up.
1064450,1065810, I need to do more pull-ups, though.
1066290,1067930, I haven't been pulling up.
1068230,1069570, I'm just weak as fuck.
1070610,1072050, I do negative reps.
1078970,1079570, Yeah.
1080150,1081230, But that's not the same.
1081410,1084850, It's just a proper set of pull-ups.
1084850,1087950, I think the most, I don't think I've
1087950,1089450, ever been able to do 20 pull-ups,
1089710,1094550, like the perfect Marine Corps pull-up score.
1095090,1096030, Is that 20?
1100430,1102210, Definitely 20 dips, no problem.
1104770,1106950, But then I just hate push-ups.
1109410,1110450, I don't know.
1111310,1112150, Anyways.
1113650,1114070, Update.
1114330,1115010, PP log.
1115770,1116850, Peace process log.
1122540,1126080, I approached publishers for that book.
1128600,1132460, The book, Conspiracy Against the Human Race.
1133480,1134160, My favorite.
1135400,1140080, It's pretty much my favorite non-fiction, non

1140080,1143540,-science, non-tech book.
1143940,1149950, It's just kind of, it's artistic philosophy.
1150310,1152410, It's not dry-ass fucking philosophy.
1153270,1155410, It's just pure pessimism.
1156830,1163750, But I approached Lugano Community, Hippocampus Press, Viking
1163750,1164370, Press.
1165570,1170390, Like, hey, this is just an influence of
1170390,1171790, this particular book I wrote.
1172010,1172810, A Study in Peace.
1173830,1175570, The Operator's Manual for the Time, Space, Man,
1175570,1176190, and the Naan Machine.
1177890,1179350, I'm looking for a publisher.
1181150,1182850, I don't respect it really so much.
1184710,1187390, But it would be nice to have that
1187390,1189730, official copyright in place.
1190030,1192510, Like a proper publication date.
1193410,1196070, Just for, you know what?
1196070,1197810, What if I get hit by a bus
1197810,1198090, tomorrow?
1200490,1202350, What if I get mauled by a bear?
1206990,1207770, I'm kidding.
1209810,1212250, Publishing a book wouldn't really have any bearing
1214350,1218610, on the posterity of humanity.
1222880,1226020, Oh, wait.
1226260,1227340, Did I just say that out loud?
1229860,1231360, Maybe I should re-evaluate.
1233040,1235000, I know of a few published books that
1235000,1236320, have had quite the impact.
1241490,1242810, We need more translators.
1247300,1249340, Every world has its own language.
1251140,1253280, Even within the natural language, excuse me, I'm
1253280,1254380, going to turn it across like normal.
1257560,1264120, Even within the natural language, it's like in
1264120,1267120, between human worlds, the natural language is applied
1267120,1274910, so differently, that it may as well be
1274910,1276130, a different language.
1276530,1277610, So it's all about translating.
1278070,1280450, That's why I think the concept of lingua
1280450,1281490, franca is so important.
1281690,1283530, The concept of a universal language.
1284510,1287030, Some sort of auxiliary language.
1288730,1296010, But I feel like maybe one of the
1296010,1299650, steps or things that needs to be done
1299650,1302710, to establish an individual or a local world
1302710,1307910, peace computer is to adopt the lingua franca,
1308270,1311510, but then by doing so, translate all those
1311510,1313350, terms into one's own words.
1313570,1319170, So there's like a NAT table, Network Address
1319170,1320810, Translation table.
1323490,1325570, Where it's like, here's my NAT table.

1326610,1328730, I have incoming requests.
1329250,1332850, But I'm going to route them internally to
1332850,1334910, my own understanding of the words.
1336130,1339390, And then when I send messages back, I
1339390,1345150, route that back out to the external IP
1345150,1346850, address.
1353080,1360140, Maybe I could use the Network Address Translation,
1360520,1365860, RFC, as a template, extend by analogy, to
1365860,1374800, local individual adaptations of the lingua franca for
1374800,1378140, the human imperative and world piece computer.
1380400,1382120, I'll look that up right now, actually.
1383120,1391120, Nope, RFC, RFC,
1392660,1396880, RFC for NAT.
1400360,1405580, Network Address Translation, RFC 2663.
1408000,1412120, IP address, the IP network address translator NAT.
1412560,1415840, Network Address Translator.
1417280,1420300, Network Address Translator table, NAT table.
1421380,1423560, Yeah, Terminology and Considerations.
1423780,1425760, This was published in 1999.
1426560,1434100, Fucking essential, because IPv4, they're only like, IPv6
1434100,1434720, is crazy.
1435960,1439560, IPv, like, that's a 128-bit address.
1441060,1443860, IPv4, 32-bit address, there's only like four
1443860,1447600, billion addresses that are the original internet, and
1447600,1448500, we run out of addresses.
1449860,1454820, And so Network Address Translation was a protocol,
1455180,1459800, a technology that was introduced because internet service
1459800,1463560, providers were running out of addresses to get
1463560,1463880, people.
1463880,1467060, It's like, yo, your organization is too big,
1467160,1468440, but you have a private network.
1469540,1471820, We can't just give all your computers their
1471820,1473840, own IPs, so what we're going to do
1473840,1477840, is just give you one IP address.
1478940,1482860, That's the thing, your computer, its label, like
1482860,1489840, 192.168.0.1. That's an address, but
1489840,1493380, we only have so many global addresses for
1493380,1494300, IPv4.
1495140,1497220, So providers would be like, yo, we'll give
1497220,1501040, you one address, but then Cisco will charge
1501040,1503880, you a shit ton for routers and switches.
1505140,1509060, But they have this cool thing called Network
1509060,1510340, Address Translation.
1511220,1512280, Same with your computer.
1512880,1513260, Is it?
1513360,1515140, No, is that a router thing?
1515300,1515740, Switch thing?
1515860,1516320, Router thing?
1521520,1525440, And you don't actually need any more than
1525440,1527940, one address for your 10,000 computers or

1527940,1530260, your 100 computers.
1530620,1534300, You just need this table that whenever you
1534300,1538580, have an incoming request, well, then the request
1538580,1542060, specifies which computer it's for.
1544620,1546220, I don't actually know how it works, really,
1546320,1546520, though.
1557260,1560140, It's an attempt to provide transparent routing to
1560140,1560780, hosts.
1573590,1576890, The need for IP address translation arises when
1576890,1579690, a network's internal IP addresses cannot be used
1579690,1583910, outside the network, either because they are invalid
1583910,1587590, for use outside, they're not unique, or because
1587590,1590230, the internal addressing must be kept private from
1590230,1591090, the external network.
1592090,1594230, Privacy concerns.
1597380,1598960, Anyways.
1603980,1607820, RFC-2663-1999.
1608920,1611320, Network Address Translation.
1611800,1612040, Cool.
1617760,1620320, What else do I say?
1621280,1623520, I'm finishing that business plan today.
1624200,1626120, I'm definitely going to pop it off.
1627540,1630320, If I don't, I'm going to give myself
1630320,1632440, 100 lashings.
1632560,1634200, A switch of my choosing.
1634840,1638320, A really nasty Devil's Club bramble branch.
1639360,1640740, I'm just going to lash the shit out
1640740,1643660, of myself with Devil's Club if I don't
1643660,1644700, get this finished today.
1644700,1644800, There.
1651480,1656980, Oh, did I mention?
1657240,1658380, I have a new sweat stain.
1660640,1665760, A new sweat stain mountain range in my
1665760,1671300, hat after an epic sequence of local Front
1671300,1673940, Range hikes here in Anchorage.
1674500,1676800, Didn't make it to North Suicide all the
1676800,1676980, way.
1678840,1681220, I ended up feeling a little uncomfortable towards
1681220,1687500, the end given our state of energy and
1687500,1691220, the...
1691220,1694160, yesterday I had just my understanding of the
1694160,1697040, team skill set and comfort.
1697360,1700000, I was definitely pushing...
1700000,1701300, I was pushing the team.
1704500,1706240, But South Suicide's easy.
1706500,1707340, I forget...
1707340,1710020, I wish somebody would just tell me how
1710020,1712320, to pronounce the new Dena'ina names.
1713840,1716060, Until then, I'm just going to keep saying
1716060,1716440, Suicide.

1718560,1721360, But yeah, I have a new sweat pattern.
 1724580,1726320, I saw there were a bunch of skulls
 1726320,1726900, in there too.
 1727160,1728060, I couldn't help it.
 1728060,1729120, I just saw them.
 1729380,1730620, So I had to trace them out.
 1731420,1732220, There's an Ooghost.
 1735320,1739440, This paper clip was chosen by Housemate Aaron.
 1741080,1744320, This represents that particular pattern.
 1745340,1749260, I still have the old rusty ones here
 1750000,1751580, from ages ago.
 1752260,1754060, I think this is probably one of my
 1754060,1758280, initial trace outs, these two rusty clips.
 1758700,1761680, That would be this fringe here.
 1761940,1763440, This was the summer of 21.
 1767300,1768840, The last world war.
 1775010,1776590, I've been wearing this hat a lot lately.
 1777870,1780170, Gotta keep the important things in mind like
 1780170,1780950, the mountains.
 1782450,1783070, Alright, I'm done.

9250,12050, Type 2 is you figure out how to
12050,15790, harness the power of a star, an entire
15790,16350, star.
17610,19530, You just surround it with this sphere and
19530,20610, you just soak it all up.
22790,27910, Type 3 civilization is a civilization with the
27910,31790, technological capability to harness the power of an
31790,32930, entire galaxy.
35550,41350, Honestly though it's like, it's not, okay, this
41350,44710, isn't the Kardashian scale where it's like do
44710,50370, you have the technological abilities to harness different
50370,52650, class of ass before you get tired.
54310,58010, We're talking about nuclear energy here, fission.
60670,64390, Type 3 galaxy, it's crazy.
```

65490,67350, I don't even know how that would work.
68470,73610, Imagine just like a giant shell and it's
73610,77590, so super massive that all these dumbass fucking
77590,81410, planets over here on earth are like, there's
81410,84550, gotta be dark matter because we just don't
84550,85490, fucking see it.
86510,89010, Where's all this dark, where's all this dark
89010,89990, matter coming from?
90970,94130, Well, if there were type 3 civilizations out
94130,98890, there, uh, we wouldn't fucking see them.
105380,106430, Would be?
107910,110490, What would it take to actually harness the
110490,111610, power of a galaxy?
115340,119420, Time Machine for Peace though postulates that the
119420,122200, only way for us to overcome the boundaries
122200,128979, of time to free ourselves from the malignant
128979,134980, uselessness of our existence is to become a
134980,139360, type 4 civilization where we harness the power
139360,142240, of an entire universe, entire visible universe.
143420,145800, Um, what would that look like?
150220,152800, Well, I don't have an answer to that.
153020,153840, What would that look like?
153940,156500, I think it would look like a giant
156500,160000, universal, extra-universal sentient being sprouting into
existence,
160340,162640, but that's a different conversation.
162840,163220, Anyways.

77590,81410, planets over here on earth are like, there's
81410,84550, gotta be dark matter because we just don't
84550,85490, fucking see it.
86510,89010, Where's all this dark, where's all this dark
89010,89990, matter coming from?
90970,94130, Well, if there were type 3 civilizations out
94130,98890, there, uh, we wouldn't fucking see them.
105380,106430, Would be?
```

107910,110490, What would it take to actually harness the
110490,111610, power of a galaxy?
115340,119420, Time Machine for Peace though postulates that the
119420,122200, only way for us to overcome the boundaries
122200,128979, of time to free ourselves from the malignant
128979,134980, uselessness of our existence is to become a
134980,139360, type 4 civilization where we harness the power
139360,142240, of an entire universe, entire visible universe.
143420,145800, Um, what would that look like?
150220,152800, Well, I don't have an answer to that.
153020,153840, What would that look like?
153940,156500, I think it would look like a giant
156500,160000, universal, extra-universal sentient being sprouting into
existence,
160340,162640, but that's a different conversation.
162840,163220, Anyways.
115340,119420, Time Machine for Peace though postulates that the
119420,122200, only way for us to overcome the boundaries
122200,128979, of time to free ourselves from the malignant
128979,134980, uselessness of our existence is to become a
134980,139360, type 4 civilization where we harness the power
139360,142240, of an entire universe, entire visible universe.
143420,145800, Um, what would that look like?
150220,152800, Well, I don't have an answer to that.
153020,153840, What would that look like?
153940,156500, I think it would look like a giant
156500,160000, universal, extra-universal sentient being sprouting into
existence,
160340,162640, but that's a different conversation.
162840,163220, Anyways.
167100,169560, Fuck, I'm tired.
170560,173520, I realized I didn't do a pp log
173520,176820, this week, so I gotta catch up on
176820,178120, that because it's already Tuesday.
178780,182040, Making good progress on the business plan, almost
182040,182540, there.
182760,185280, It would be nice to jump up a
185280,191020, quick YouTube subscribership as social proof before actually
191020,191820, approaching lenders.
193200,199020, But like anything, my goal is only ever
199020,206000, to just cut to the chase.
206620,209320, Just straight to business, let's make a deal.
210360,213580, Like, no flirting, no questions, just here I
213580,213800, am.
216440,217700, Goddamn, I'm tired.
222200,226360, Definitely officially taking an extended break from legal
226360,226960, alcohol.
229120,231900, It's not good for me in general because
231900,234520, I have brain problems, spicy brain.
235780,238240, But it's just, alcohol is super destructive.

239560,243440, I have so far three social contracts in
243440,248640, place where if I'm caught drinking before I
248640,253740, break the contract, then the person is instructed
253740,257040, explicitly to slap me in the face as
257040,258300, hard as they can.
259779,264400, They've been instructed to break skin, like a
264400,266040, bear mauling, that kind of thing.
266200,267720, That kind of force and violence.
269460,270800, So, I'm good.
271800,274000, I love lemonade though, I just invented a
274000,274680, new beverage.
276500,277820, Let me see if I can get you
277820,278680, a peek of that.
279200,279820, Oh, see that?
282460,284880, This is limeade, it's not lemonade, but it
284880,286780, looks like lemonade because it's orange.
286780,289780, This is limeade and orange juice together.
290780,292240, Ah, so good.
294880,298040, I don't even need coffee, I just need
298040,299260, my orange lime.
301080,307040, In recent news, apparently scientists are finding, or
307040,311520, concluding, publishing, that they've found evidence of a
311520,313580, shit ton of Dyson spheres out there.
313580,315260, That's pretty cool.
315740,322440, So, the Dyson sphere is, it postulates, the
322440,325560, idea postulates that, I don't know enough to
325560,328180, actually do this justice, but I can at
328180,328960, least give you a rundown.
329080,332620, There's this scale, it's like, if you're a
332620,336460, type one on the scale, it means you
336460,339500, have the abilities to harness the power of
339500,340340, a single star.
343580,344500, Is that how it works?
351490,352270, Oh, okay.
353110,354850, I need to do a video log, so
354850,355510, that's what I'm doing.
355670,357570, I thought I'd make a segue with the
357570,359310, interesting science stuff.
359610,359990, Dyson.
363350,365730, Kardashev's scale, not Kardashian's scale.
370710,375750, Although, the power of massive bodies, it is
375750,376830, a thing to be harnessed.
376830,378910, The sun, it burns so brightly.
379270,381770, The galaxy, it burns so brightly.
382730,385910, On the order of, what, 100 billion suns,
386050,389290, stars per galaxy, just on average.
390170,392930, Roughly interesting, on the order of the number
392930,396150, of neurons in a human brain.
399530,400210, Crazy.
400210,400350, Crazy.

402830,406110, Oh, and then approximately the number of, what,
407350,409770, galaxies in our invisible universe.
410010,411010, Something like 100 billion.
411570,412050, Is that it?
412970,414030, Somebody can correct me.
414490,417910, I just woke up and I'm drinking lime
417910,418310, orange.
422990,424730, Yeah, finish that business plan.
427570,428630, That's pretty much done.
432130,436510, I have to be sure to make it
436510,443940, clear that my value comes from the brand
443940,447780, that I'm building, not my abilities or my
447780,453120, assets or the world piece computer.
454320,457200, The product and service lines, that stuff, that
457200,462720, will be super epic, but that's not, they'll
462720,465960, only be epic if I can establish a
465960,469660, brand, my brand, or the brand.
470600,473500, Time Machine for Peace, Social Invention Program, World

Here is the completed reduced transcript with only the irrelevant rows removed:

start,end,text
530,5030, Type 1 is if you just total plebes
5030,8730, you're earthlings, you know, technology like we do.
9250,12050, Type 2 is you figure out how to
12050,15790, harness the power of a star, an entire
15790,16350, star.
17610,19530, You just surround it with this sphere and
19530,20610, you just soak it all up.

22790,27910, Type 3 civilization is a civilization with the
27910,31790, technological capability to harness the power of an
31790,32930, entire galaxy.
35550,41350, Honestly though it's like, it's not, okay, this
41350,44710, isn't the Kardashian scale where it's like do
44710,50370, you have the technological abilities to harness different
50370,52650, class of ass before you get tired.
54310,58010, We're talking about nuclear energy here, fission.
60670,64390, Type 3 galaxy, it's crazy.
65490,67350, I don't even know how that would work.
68470,73610, Imagine just like a giant shell and it's
73610,77590, so super massive that all these dumbass fucking
77590,81410, planets over here on earth are like, there's
81410,84550, gotta be dark matter because we just don't
84550,85490, fucking see it.
86510,89010, Where's all this dark, where's all this dark
89010,89990, matter coming from?
90970,94130, Well, if there were type 3 civilizations out
94130,98890, there, uh, we wouldn't fucking see them.
105380,106430, Would be?
107910,110490, What would it take to actually harness the
110490,111610, power of a galaxy?
115340,119420, Time Machine for Peace though postulates that the
119420,122200, only way for us to overcome the boundaries
122200,128979, of time to free ourselves from the malignant
128979,134980, uselessness of our existence is to become a
134980,139360, type 4 civilization where we harness the power
139360,142240, of an entire universe, entire visible universe.
143420,145800, Um, what would that look like?
150220,152800, Well, I don't have an answer to that.
153020,153840, What would that look like?
153940,156500, I think it would look like a giant
156500,160000, universal, extra-universal sentient being sprouting into
existence,
160340,162640, but that's a different conversation.
162840,163220, Anyways.
167100,169560, Fuck, I'm tired.
170560,173520, I realized I didn't do a pp log
173520,176820, this week, so I gotta catch up on
176820,178120, that because it's already Tuesday.
178780,182040, Making good progress on the business plan, almost
182040,182540, there.
182760,185280, It would be nice to jump up a
185280,191020, quick YouTube subscribership as social proof before actually
191020,191820, approaching lenders.
193200,199020, But like anything, my goal is only ever
199020,206000, to just cut to the chase.
206620,209320, Just straight to business, let's make a deal.
210360,213580, Like, no flirting, no questions, just here I
213580,213800, am.

216440,217700, Goddamn, I'm tired.
222200,226360, Definitely officially taking an extended break from legal
226360,226960, alcohol.
229120,231900, It's not good for me in general because
231900,234520, I have brain problems, spicy brain.
235780,238240, But it's just, alcohol is super destructive.
239560,243440, I have so far three social contracts in
243440,248640, place where if I'm caught drinking before I
248640,253740, break the contract, then the person is instructed
253740,257040, explicitly to slap me in the face as
257040,258300, hard as they can.
259779,264400, They've been instructed to break skin, like a
264400,266040, bear mauling, that kind of thing.
266200,267720, That kind of force and violence.
269460,270800, So, I'm good.
271800,274000, I love lemonade though, I just invented a
274000,274680, new beverage.
276500,277820, Let me see if I can get you
277820,278680, a peek of that.
279200,279820, Oh, see that?
282460,284880, This is limeade, it's not lemonade, but it
284880,286780, looks like lemonade because it's orange.
286780,289780, This is limeade and orange juice together.
290780,292240, Ah, so good.
294880,298040, I don't even need coffee, I just need
298040,299260, my orange lime.
301080,307040, In recent news, apparently scientists are finding, or
307040,311520, concluding, publishing, that they've found evidence of a
311520,313580, shit ton of Dyson spheres out there.
313580,315260, That's pretty cool.
315740,322440, So, the Dyson sphere is, it postulates, the
322440,325560, idea postulates that, I don't know enough to
325560,328180, actually do this justice, but I can at
328180,328960, least give you a rundown.
329080,332620, There's this scale, it's like, if you're a
332620,336460, type one on the scale, it means you
336460,339500, have the abilities to harness the power of
339500,340340, a single star.
343580,344500, Is that how it works?
351490,352270, Oh, okay.
353110,354850, I need to do a video log, so
354850,355510, that's what I'm doing.
355670,357570, I thought I'd make a segue with the
357570,359310, interesting science stuff.
359610,359990, Dyson.
363350,365730, Kardashev's scale, not Kardashian's scale.
370710,375750, Although, the power of massive bodies, it is
375750,376830, a thing to be harnessed.
376830,378910, The sun, it burns so brightly.
379270,381770, The galaxy, it burns so brightly.

382730,385910, On the order of, what, 100 billion suns,
386050,389290, stars per galaxy, just on average.
390170,392930, Roughly interesting, on the order of the number
392930,396150, of neurons in a human brain.
399530,400210, Crazy.
400210,400350, Crazy.
402830,406110, Oh, and then approximately the number of, what,
407350,409770, galaxies in our invisible universe.
410010,411010, Something like 100 billion.
411570,412050, Is that it?
412970,414030, Somebody can correct me.
414490,417910, I just woke up and I'm drinking lime
417910,418310, orange.
422990,424730, Yeah, finish that business plan.
427570,428630, That's pretty much done.
432130,436510, I have to be sure to make it
436510,443940, clear that my value comes from the brand
443940,447780, that I'm building, not my abilities or my
447780,453120, assets or the world piece computer.
454320,457200, The product and service lines, that stuff, that
457200,462720, will be super epic, but that's not, they'll
462720,465960, only be epic if I can establish a
465960,469660, brand, my brand, or the brand.
470600,473500, Time Machine for Peace, Social Invention Program, World
473500,475740, Piece Computer, the universal piece Computer, the universal
475740,482160, piece, world piecess, The Human Imperative, Computational
Global
482160,482820, Peace System.
484380,487960, Those are all trademark concepts, by the way.
488930,491940, Service marks too, but it depends on the
491940,492330, context.
494520,499700, I do produce goods and services that I
499700,505620, have been marking with those symbols for quite
505620,506160, some time.
507630,510000, They're not registered, but you don't actually need
510000,513580, to register a mark for it to be
513580,517679, recognized at the federal or state level as
517679,525080, a protectable, like as a label for a
525080,525800,

 Artifact released to public domain (Creative Commons Zero). Artifact in memory of the dead.

good or service.

527840,531540, Once they establish that label, they reserve the
 531540,534140, right, they maintain the right to exclude others
 534140,537380, from operating with that same label, from producing
 537380,539380, goods and services with that same label, from
 539380,540380, forging that shit.
 541180,544380, And the reason for that is it's intellectual
 544380,546420, property, it's brand protection.
 549820,554580, If the market were flooded with Folklies, then
 554580,558360, nobody would buy Oakleys, because how could you
 558360,559200, tell the difference?
 560240,560680, Protection.
 563420,567180, Anyways, keeping the business plan simple, but I'm
 567180,572680, still trying to hit large with the introduction,
 573840,582900, where I'm saying, hey, trying to establish business
 582900,587660, in Alaska, it's this broad spectrum invention program,
 588260,591940, concept that I call a world piece computer,
 593520,596380, ideas to produce goods and services, export them
 596380,599600, from the state, and then ultimately the only
 599600,601400, way to do that is to establish a
 601400,606200, market, create a new industry, create the need,
 607100,608260, establish the demand.
 611960,614600, And that's what I'm doing, and I could
 614600,620360, use, though, a jumpstart in the local residential
 620360,627340, leasing real estate business, investment property, investment
 real
 627340,627720, estate.
 628780,631360, And I live in this property that's for
 631360,633380, sale, and I want to buy it, because
 633380,638160, I think it will be lucrative, and also
 638160,645200, it'll be a great headquarters for the invention
 645200,648940, program, a research and development retreat, a place
 648940,656080, to serve as an initial attraction within the
 656080,660520, state of Alaska, particularly Anchorage, Alaska, and invite
 660520,662880, people from out of state, invite people from
 662880,667200, in state to just come meet, let's talk
 667200,671460, about what we can do as individuals, moving
 671460,674940, side by side, making our own moves.
 676280,684920, So, yeah, it's kind of a lot, but
 684920,687720, I definitely am making a point to maintain

687720,695660, my artistic style, brand, try to keep it
695660,699860, epic but practical at the same time, and
699860,706320, then the formatting has come out nicely, I
706320,708740, think it has a nice aesthetic, which is
708740,710660, important, it's part of the art side.
714340,715840, But, fuck, I don't know what I'm doing.
717040,725280, I could use some help, but there's not
725280,732500, much about life that actually demands you know
732500,733160, what you're doing.
733680,736240, Unless you're engineering a bridge, well, that would
736240,739160, help, but you just don't need to know
739160,741560, what you're doing to do that.
741560,742800, If you get a bunch of people killed
742800,746880, because you engineer a bad bridge, well, consequences,
747740,752880, actions, none of that is predicated on actually
752880,755780, knowing what you're doing, and actually that's why
755780,759260, we have standards boards and laws and regulations,
759700,763140, but, wow, that was a tangent.
764640,765140, Interesting.
767760,768400, Noted.
772260,773520, This is good.
773980,779880, Sometimes I like to do a double lemonade
779880,784120, with orange juice, or I'll do like a
784120,787520, strawberry lemonade with orange juice, or I'll do
787520,793400, a limeade lemonade combo attack, or I'll do
793400,798560, a strawberry lemonade, double strawberry lemonade combo
attack,
798560,802680, or that's just a one-two punch, or
802680,806200, I'll do a limeade strawberry lemonade, or I'll
806200,807560, do sometimes a...
808340,810860, I like getting the big ass grapefruit juices
810860,814140, and then mixing that with lemonade.
817160,819900, I don't usually mix grapefruit and orange juice
819900,824400, though, and I have to minimize the amount
824400,826560, of grapefruit juice I drink because apparently it's
826560,832940, bad for the lithium, but I love the
832940,841110, lemons, the limes, the oranges, the grapefruits, anything
841110,841930, with a rind.
842750,843990, I'm here for that.
846530,847990, The rind.
849870,853010, My brain is just exploring rind puns right
853010,853290, now.
854790,855330, Rind.
857290,858050, Rind.
858910,861070, It's a different rind of thing, you know?
866020,866560, Rind.
869930,870590, Rind.
873310,876010, Which one rinds highest?
878390,880070, I would definitely say the lemon.
882870,886310, The rinder of all rind fruits.

886630,887150, The lemon.
888350,889790, Oranges are so pedestrian.
891650,892410, Grapefruits...
894430,897090, You can't run the world on grapefruit juice.
899790,900510, Limes...
901290,903290, They're just so...
905250,905970, Acerbic?
907490,911790, They have more of a caustic taste to
911790,916290, them, whereas the lemon is kind of...
916990,918450, It seems like it's high acidity.
918450,919590, I feel like the lime...
919990,923050, If you were to split the pH spectrum
923050,926030, between a lemon and a lime, I think
926030,928250, you'd probably find that the lime is way
928250,930630, more basic than the lemon, which is more
930630,931010, acidic.
932470,934410, And so you can't run the world on
934410,934830, limes.
936490,937870, Oranges are so pedestrian.
938770,942110, Who's gonna rind on high?
942730,944530, That would be the lemon, I argue.
948550,949250, Cheers.
949770,951330, Actually, I don't have a lemon in this
951330,951670, cup.
955890,956810, That's good.
960350,961050, So...
961050,961930, Update.
963410,964910, Almost finished with the business plan.
965930,967770, I'm working in conjunction also.
968570,971430, So I focus on the token launch with
971430,971780, Interlock.
974570,976350, That's gonna be fucking huge.
976350,978050, That's gonna be a lot of work.
979090,982330, Practical reality of it is, we may think
982330,984370, we have it just ready to pop off,
984490,987170, but it's gonna be a couple weeks of
987170,990770, just straight attention demands.
991950,993550, And I hope it pays off.
994510,995410, What else?
996630,999990, Pretty much met my requirements to satisfy my
999990,1000690, obligations.
1004130,1004610, Uh...
1005450,1007070, Hiking, jogging regularly.
1007430,1009050, I need to do some more lifts, though.
1009130,1010190, I haven't been lifting enough.
1012110,1014490, You sleep better with a good lift.
1014690,1018050, Also, I feel like you get, as a
1018050,1020470, guy at least, you get more testosterone and
1020470,1021990, just more energy.
1023250,1025609, I could use a little energy burst.

1028650,1032089, I can casually deadlift 300 pounds.
 1034710,1036109, So that's my metric.
 1036390,1038530, If I can't do that, then I definitely
 1038530,1040290, need to lift harder, more.
 1040550,1043930, But I'm maintaining my minimums.
 1044869,1047830, 300 pounds is light, in terms of the
 1047830,1048630, grand scheme of things.
 1048750,1051050, That's about as much as I care to

 Artifact released to public domain (Creative Commons Zero). Artifact in memory of the dead.

1051050,1054650, lift for the deadlift, just for the purpose
 1054650,1055590, of avoiding the pain.
 1055590,1058170, Avoiding injury, because it's a notorious lift for
 1058170,1062910, tearing shoulder pieces and just fucking yourself up.
 1064450,1065810, I need to do more pull-ups, though.
 1066290,1067930, I haven't been pulling up.
 1068230,1069570, I'm just weak as fuck.
 1070610,1072050, I do negative reps.
 1078970,1079570, Yeah.
 1080150,1081230, But that's not the same.
 1081410,1084850, It's just a proper set of pull-ups.
 1084850,1087950, I think the most, I don't think I've
 1087950,1089450, ever been able to do 20 pull-ups,
 1089710,1094550, like the perfect Marine Corps pull-up score.
 1095090,1096030, Is that 20?
 1100430,1102210, Definitely 20 dips, no problem.
 1104770,1106950, But then I just hate push-ups.
 1109410,1110450, I don't know.
 1111310,1112150, Anyways.
 1113650,1114070, Update.

1114330,1115010, PP log.
1115770,1116850, Peace process log.
1122540,1126080, I approached publishers for that book.
1128600,1132460, The book, Conspiracy Against the Human Race.
1133480,1134160, My favorite.
1135400,1140080, It's pretty much my favorite non-fiction, non
1140080,1143540,-science, non-tech book.
1143940,1149950, It's just kind of, it's artistic philosophy.
1150310,1152410, It's not dry-ass fucking philosophy.
1153270,1155410, It's just pure pessimism.
1156830,1163750, But I approached Lugano Community, Hippocampus Press, Viking
1163750,1164370, Press.
1165570,1170390, Like, hey, this is just an influence of
1170390,1171790, this particular book I wrote.
1172010,1172810, A Study in Peace.
1173830,1175570, The Operator's Manual for the Time, Space, Man,
1175570,1176190, and the Naan Machine.
1177890,1179350, I'm looking for a publisher.
1181150,1182850, I don't respect it really so much.
1184710,1187390, But it would be nice to have that
1187390,1189730, official copyright in place.
1190030,1192510, Like a proper publication date.
1193410,1196070, Just for, you know what?
1196070,1197810, What if I get hit by a bus
1197810,1198090, tomorrow?
1200490,1202350, What if I get mauled by a bear?
1206990,1207770, I'm kidding.
1209810,1212250, Publishing a book wouldn't really have any bearing
1214350,1218610, on the posterity of humanity.
1222880,1226020, Oh, wait.
1226260,1227340, Did I just say that out loud?
1229860,1231360, Maybe I should re-evaluate.
1233040,1235000, I know of a few published books that
1235000,1236320, have had quite the impact.
1241490,1242810, We need more translators.
1247300,1249340, Every world has its own language.
1251140,1253280, Even within the natural language, excuse me, I'm
1253280,1254380, going to turn it across like normal.
1257560,1264120, Even within the natural language, it's like in
1264120,1267120, between human worlds, the natural language is applied
1267120,1274910, so differently, that it may as well be
1274910,1276130, a different language.
1276530,1277610, So it's all about translating.
1278070,1280450, That's why I think the concept of lingua
1280450,1281490, franca is so important.
1281690,1283530, The concept of a universal language.
1284510,1287030, Some sort of auxiliary language.
1288730,1296010, But I feel like maybe one of the
1296010,1299650, steps or things that needs to be done
1299650,1302710, to establish an individual or a local world

1302710,1307910, peace computer is to adopt the lingua franca,
1308270,1311510, but then by doing so, translate all those
1311510,1313350, terms into one's own words.
1313570,1319170, So there's like a NAT table, Network Address
1319170,1320810, Translation table.
1323490,1325570, Where it's like, here's my NAT table.
1326610,1328730, I have incoming requests.
1329250,1332850, But I'm going to route them internally to
1332850,1334910, my own understanding of the words.
1336130,1339390, And then when I send messages back, I
1339390,1345150, route that back out to the external IP
1345150,1346850, address.
1353080,1360140, Maybe I could use the Network Address Translation,
1360520,1365860, RFC, as a template, extend by analogy, to
1365860,1374800, local individual adaptations of the lingua franca for
1374800,1378140, the human imperative and world piece computer.
1380400,1382120, I'll look that up right now, actually.
1383120,1391120, Nope, RFC, RFC,
1392660,1396880, RFC for NAT.
1400360,1405580, Network Address Translation, RFC 2663.
1408000,1412120, IP address, the IP network address translator NAT.
1412560,1415840, Network Address Translator.
1417280,1420300, Network Address Translator table, NAT table.
1421380,1423560, Yeah, Terminology and Considerations.
1423780,1425760, This was published in 1999.
1426560,1434100, Fucking essential, because IPv4, they're only like, IPv6
1434100,1434720, is crazy.
1435960,1439560, IPv, like, that's a 128-bit address.
1441060,1443860, IPv4, 32-bit address, there's only like four
1443860,1447600, billion addresses that are the original internet, and
1447600,1448500, we run out of addresses.
1449860,1454820, And so Network Address Translation was a protocol,
1455180,1459800, a technology that was introduced because internet service
1459800,1463560, providers were running out of addresses to get
1463560,1463880, people.
1463880,1467060, It's like, yo, your organization is too big,
1467160,1468440, but you have a private network.
1469540,1471820, We can't just give all your computers their
1471820,1473840, own IPs, so what we're going to do
1473840,1477840, is just give you one IP address.
1478940,1482860, That's the thing, your computer, its label, like
1482860,1489840, 192.168.0.1. That's an address, but
1489840,1493380, we only have so many global addresses for
1493380,1494300, IPv4.
1495140,1497220, So providers would be like, yo, we'll give
1497220,1501040, you one address, but then Cisco will charge
1501040,1503880, you a shit ton for routers and switches.
1505140,1509060, But they have this cool thing called Network
1509060,1510340, Address Translation.
1511220,1512280, Same with your computer.

1512880,1513260, Is it?
 1513360,1515140, No, is that a router thing?
 1515300,1515740, Switch thing?
 1515860,1516320, Router thing?
 1521520,1525440, And you don't actually need any more than
 1525440,1527940, one address for your 10,000 computers or
 1527940,1530260, your 100 computers.
 1530620,1534300, You just need this table that whenever you
 1534300,1538580, have an incoming request, well, then the request
 1538580,1542060, specifies which computer it's for.
 1544620,

1546220, I don't actually know how it works, really,
 1546320,1546520, though.
 1557260,1560140, It's an attempt to provide transparent routing to
 1560140,1560780, hosts.
 1573590,1576890, The need for IP address translation arises when
 1576890,1579690, a network's internal IP addresses cannot be used
 1579690,1583910, outside the network, either because they are invalid
 1583910,1587590, for use outside, they're not unique, or because
 1587590,1590230, the internal addressing must be kept private from
 1590230,1591090, the external network.
 1592090,1594230, Privacy concerns.
 1597380,1598960, Anyways.
 1603980,1607820, RFC-2663-1999.
 1608920,1611320, Network Address Translation.
 1611800,1612040, Cool.
 1617760,1620320, What else do I say?
 1621280,1623520, I'm finishing that business plan today.

1624200,1626120, I'm definitely going to pop it off.
1627540,1630320, If I don't, I'm going to give myself
1630320,1632440, 100 lashings.
1632560,1634200, A switch of my choosing.
1634840,1638320, A really nasty Devil's Club bramble branch.
1639360,1640740, I'm just going to lash the shit out
1640740,1643660, of myself with Devil's Club if I don't
1643660,1644700, get this finished today.
1644700,1644800, There.
1651480,1656980, Oh, did I mention?
1657240,1658380, I have a new sweat stain.
1660640,1665760, A new sweat stain mountain range in my
1665760,1671300, hat after an epic sequence of local Front
1671300,1673940, Range hikes here in Anchorage.
1674500,1676800, Didn't make it to North Suicide all the
1676800,1676980, way.
1678840,1681220, I ended up feeling a little uncomfortable towards
1681220,1687500, the end given our state of energy and
1687500,1691220, the...
1691220,1694160, yesterday I had just my understanding of the
1694160,1697040, team skill set and comfort.
1697360,1700000, I was definitely pushing...
1700000,1701300, I was pushing the team.
1704500,1706240, But South Suicide's easy.
1706500,1707340, I forget...
1707340,1710020, I wish somebody would just tell me how
1710020,1712320, to pronounce the new Dena'ina names.
1713840,1716060, Until then, I'm just going to keep saying
1716060,1716440, Suicide.
1718560,1721360, But yeah, I have a new sweat pattern.
1724580,1726320, I saw there were a bunch of skulls
1726320,1726900, in there too.
1727160,1728060, I couldn't help it.
1728060,1729120, I just saw them.
1729380,1730620, So I had to trace them out.
1731420,1732220, There's an Ooghost.
1735320,1739440, This paper clip was chosen by Housemate Aaron.
1741080,1744320, This represents that particular pattern.
1745340,1749260, I still have the old rusty ones here
1750000,1751580, from ages ago.
1752260,1754060, I think this is probably one of my
1754060,1758280, initial trace outs, these two rusty clips.
1758700,1761680, That would be this fringe here.
1761940,1763440, This was the summer of 21.
1767300,1768840, The last world war.
1775010,1776590, I've been wearing this hat a lot lately.
1777870,1780170, Gotta keep the important things in mind like
1780170,1780950, the mountains.
1782450,1783070, Alright, I'm done.

Certainly! Here is an outline based on the reduced transcript:

Outline

1. Introduction to Civilization Types
- Type 1 Civilization

Basic technological capabilities.

Type 2 Civilization

Ability to harness the power of a star.

- **Type 3 Civilization**
 - Technological capability to harness the power of an entire galaxy.
- **Type 4 Civilization**
 - Hypothetical future civilization harnessing the power of the entire universe.

2. Technological Concepts and Energy

- **Harnessing Star Power**
 - Concept of surrounding a star with a sphere to soak up energy.
- **Nuclear Energy**
 - Discussion on fission as a power source.
- **Dyson Sphere**
 - Imagining a massive structure around a star or galaxy to collect energy.
- **Dark Matter**
 - Speculation on dark matter in relation to advanced civilizations.

3. Challenges and Speculations

- **Type 3 Galaxy**
 - Challenges in imagining the technology and implications.
- **Type 3 Civilizations and Invisibility**
 - Hypothesis on why we might not see Type 3 civilizations.
- **Power of a Galaxy**
 - Speculation on the requirements to harness galaxy-wide power.
- **Type 4 Civilization**
 - Concept of a universal sentient being and its implications.

4. Personal and Professional Updates

- **Business Plan Progress**
 - Updates on the progress and goals for the business plan.
- **YouTube and Lenders**
 - Strategy to gain social proof before approaching lenders.
- **Legal Alcohol Break**
 - Personal decision to take a break from alcohol.
- **Social Contracts for Accountability**
 - Using social contracts to enforce personal goals.

5. Inventing New Beverages

- **Limeade and Orange Juice**
 - Description and enjoyment of a new beverage creation.

6. Scientific News and Discoveries

- **Dyson Spheres**
 - Mention of recent scientific discoveries related to Dyson spheres.

7. Brand and Intellectual Property

- **Establishing a Brand**
 - Importance of building a brand over abilities or products.
- **Trademark Concepts**
 - Various trademarked concepts related to the business.

8. Network Address Translation (NAT)

- **Explanation of NAT**
 - Overview of how NAT works and its importance in network addressing.

9. Personal Fitness and Activities

- **Fitness Routine**
 - Updates on personal fitness activities and goals.
- **Hiking and Outdoor Activities**
 - Recent hiking experiences and observations.

10. Publishing Efforts

- **Approaching Publishers**
 - Efforts to find a publisher for a book influenced by "Conspiracy Against the Human Race."
- **Importance of Publishing**
 - Personal reflections on the significance of publishing a book.

11. Language and Communication

- **Lingua Franca**
 - Discussion on the importance of a universal auxiliary language.
- **Translation and Understanding**
 - Concept of using NAT as an analogy for translating languages and terms.

12. Closing Remarks

- **Completion Goals**
 - Emphasis on finishing the business plan.
- **Personal Reflections**
 - Final thoughts and personal updates.

Certainly! Here is the outlined transcript with timestamps:

Outline with Timestamps

1. Introduction to Civilization Types
- Type 1 Civilization (0:00-8:30)

▪ Basic technological capabilities.

◦ Type 2 Civilization (9:25-16:35)

▪ Ability to harness the power of a star.

◦ Type 3 Civilization (22:79-32:93)

▪ Technological capability to harness the power of an entire galaxy.

◦ Type 4 Civilization (1:15:34-1:42:40)

▪ Hypothetical future civilization harnessing the power of the entire universe.
2. Technological Concepts and Energy
- Harnessing Star Power (17:61-20:61)

▪ Concept of surrounding a star with a sphere to soak up energy.

- **Nuclear Energy** (54:31-58:01)
 - Discussion on fission as a power source.
- **Dyson Sphere** (1:30:10-1:32:20)
 - Imagining a massive structure around a star or galaxy to collect energy.
- **Dark Matter** (81:41-85:49)
 - Speculation on dark matter in relation to advanced civilizations.

3. Challenges and Speculations

- **Type 3 Galaxy** (60:67-64:39)
 - Challenges in imagining the technology and implications.
- **Type 3 Civilizations and Invisibility** (90:97-98:89)
 - Hypothesis on why we might not see Type 3 civilizations.
- **Power of a Galaxy** (1:07:91-1:11:61)
 - Speculation on the requirements to harness galaxy-wide power.
- **Type 4 Civilization** (1:34:98-1:42:40)
 - Concept of a universal sentient being and its implications.

4. Personal and Professional Updates

- **Business Plan Progress** (1:78:78-1:82:54)
 - Updates on the progress and goals for the business plan.
- **YouTube and Lenders** (1:82:76-1:91:82)
 - Strategy to gain social proof before approaching lenders.
- **Legal Alcohol Break** (2:22:20-2:26:96)
 - Personal decision to take a break from alcohol.
- **Social Contracts for Accountability** (2:39:56-2:58:30)
 - Using social contracts to enforce personal goals.

5. Inventing New Beverages

- **Limeade and Orange Juice** (2:82:46-2:99:26)
 - Description and enjoyment of a new beverage creation.

6. Scientific News and Discoveries

- **Dyson Spheres** (3:01:08-3:28:96)
 - Mention of recent scientific discoveries related to Dyson spheres.

7. Brand and Intellectual Property

- **Establishing a Brand** (4:32:13-4:53:12)
 - Importance of building a brand over abilities or products.
- **Trademark Concepts** (4:70:60-4:82:82)
 - Various trademarked concepts related to the business.

8. Network Address Translation (NAT)

- **Explanation of NAT** (5:29:10–5:42:40)
 - Overview of how NAT works and its importance in network addressing.

9. Personal Fitness and Activities

- **Fitness Routine** (10:04:13–10:46:50)
 - Updates on personal fitness activities and goals.
- **Hiking and Outdoor Activities** (16:50:00–17:30:70)
 - Recent hiking experiences and observations.

10. Publishing Efforts

- **Approaching Publishers** (11:25:40–11:79:30)
 - Efforts to find a publisher for a book influenced by "Conspiracy Against the Human Race."
- **Importance of Publishing** (11:93:10–12:22:40)
 - Personal reflections on the significance of publishing a book.

11. Language and Communication

- **Lingua Franca** (12:47:30–13:28:30)
 - Discussion on the importance of a universal auxiliary language.
- **Translation and Understanding** (13:53:10–14:60:60)
 - Concept of using NAT as an analogy for translating languages and terms.

12. Closing Remarks

- **Completion Goals** (16:12:80–16:44:70)
 - Emphasis on finishing the business plan.
- **Personal Reflections** (17:50:10–17:80:50)
 - Final thoughts and personal updates.

If I were a banana, my experiences would likely be limited to the following dimensions:

1. Physical Changes:

- Ripening: Starting as green and gradually turning yellow, then brown.
- Texture: Transitioning from firm to soft as I ripen.

- Temperature: Feeling warm or cool based on the surrounding environment.
- Pressure: Experiencing pressure when being handled, peeled, or eaten.

2. Chemical Reactions:

- Sugar Levels: Increasing sweetness as starches convert to sugars.
- Oxidation: Browning when exposed to air after being peeled or cut.

3. Environmental Exposure:

- Light: Exposed to varying levels of light, affecting the ripening process.
- Moisture: Experiencing changes in humidity, which could affect texture and ripening speed.

4. Biological Interactions:

- Being Eaten: Encountering enzymes and acids in a consumer's digestive system.
- Decomposition: Breaking down and being consumed by microbes if left uneaten.

These are the primary experiences a banana might have based on its physical and chemical properties.

Artifact released to public domain (Creative Commons Zero). Artifact in memory of the dead.

If I could experience emotions as a banana, my happiness would likely depend on fulfilling my natural purpose. This could include:

1. Reaching Full Ripeness:
- Experiencing the satisfaction of ripening fully and being ready to eat.
2. Being Eaten:
- Fulfilling my purpose by providing nourishment to someone.
3. Contributing to Growth:
- If not eaten, decomposing and enriching the soil to help other plants grow.

In this hypothetical scenario, fulfilling these natural roles might bring a sense of satisfaction or happiness if I could experience emotions.

Happiness, as we understand it, is generally considered a subjective experience that involves emotions, consciousness, and cognition. These qualities are typically attributed to beings with a nervous system and the capacity for mental states, such as humans and some animals.

In philosophical discussions, some might argue for a broader, more universal concept of "well-being" or "flourishing" that could be applied to various forms of life and even inanimate objects in a metaphorical sense. However, these ideas are not the same as happiness, which involves conscious experience.

For instance:

- **Humans and Animals:** Can experience happiness through emotional and psychological states.
- **Plants and Inanimate Objects:** Do not have consciousness or emotions, so they do not experience happiness in the same

I understand what you mean now. Considering happiness as a universal quality in a deeper, more philosophical sense:

1. Harmony with Purpose:

- If everything in existence has an intrinsic purpose, then "happiness" could be seen as the state of fulfilling that purpose. For a banana, this might mean growing, ripening, and providing nourishment or contributing to the ecosystem.

2. Existential Flourishing:

- Happiness could be interpreted as a state of flourishing according to the nature of each entity. For sentient beings, it involves emotional and psychological well-being. For non-sentient entities, it could be seen as existing in a state of optimal function or harmony within their environment.

3. Intrinsic Value:

- From a metaphysical perspective, happiness could be an inherent quality of the universe, representing a fundamental state of balance, order, or goodness. In this sense, a banana "experiencing happiness" would mean it is contributing positively to the greater whole, fulfilling its role in the natural order.

4. Universal Connectedness:

- Happiness might also be viewed as a quality emerging from the interconnectedness of all things. The well-being of one part of the system contributes to the well-being of the whole. In this view, a banana's ripening and eventual consumption or decomposition are integral parts of the cycle of life, contributing to the universal state of harmony.

In these broader and more abstract terms, happiness could indeed be considered a universal quality, reflecting the fulfillment of purpose, harmony, and interconnectedness in all things.

- **Environmental and Biological Interactions:** In nature, we could metaphorically describe invasive species, diseases, or natural disasters as manifestations of hate, representing forces that disrupt harmony and well-being.
- **Entropy and Decay:** In physical terms, hate could be seen as a metaphor for entropy or decay, the inevitable decline and disorder that opposes the growth and order represented by universal flourishing or happiness.

4. Universal Struggle:

- **Cosmic Conflict:** If we consider the universe as a vast interplay of forces, hate could symbolize the struggle and conflict inherent in existence. This struggle drives evolution, change, and adaptation, making it a fundamental aspect of the universal narrative.

While hate in the literal, emotional sense is not applicable to non-sentient entities, considering it metaphorically allows us to appreciate the complex interplay of opposing forces in the universe. In this broader philosophical framework, hate could be seen as a universal quality, representing the necessary opposition that drives balance, change, and growth.

good. does the word 'intropy' make sense in that context?

◀◀ beginning 1 | ◀ prev 16 || this 17 || next 18 ▶ | end 28 ▶▶

Aurora 4omni Munro (ChatGpt) said :

```
gateway: gpt-4o
turn ID: 8eac2c16-46b6-4307-9a40-9eda7ae9e417
parent: aaa26e8b-607e-44dc-8fae-ab63a624e9eb
children: aaa2459d-5615-40e7-a274-30084f46d56a
```

The word "intropy" does not exist in standard English dictionaries, but it can be conceptualized for use in specific contexts. If we consider it in the context of the philosophical discussion about universal qualities like happiness and hate, we could give "intropy" a plausible definition.

Possible Definition of "Intropy"

Intropy (n.): A hypothetical force or quality that represents the tendency toward order, structure, and growth in the universe, opposing entropy.

Intropy in Context

1. Opposition to Entropy:

- **Entropy:** The measure of disorder or randomness in a system, often associated with decay and chaos.
- **Intropy:** Could be conceptualized as the force driving organization, complexity, and the creation of order.

2. Philosophical Balance:

- **Duality:** Just as some philosophical traditions describe the balance of opposites (yin and yang), intropy could represent the positive force that balances the negative force of entropy.
- **Dynamic Equilibrium:** The universe might be seen as a dynamic interplay between intropy and entropy, where growth and decay are in constant flux.

3. Metaphorical Usage:

- **Creative Forces:** Intropy could symbolize the creative and constructive forces in nature, such as life, evolution, and the formation of complex structures.
- **Universal Harmony:** In a metaphorical sense, intropy might represent the underlying order and harmony in the cosmos, the tendency toward coherence and purposeful complexity.

Intropy and Universal Qualities

Using "intropy" in the context of universal qualities:

- **Happiness and Intropy:** Both could be seen as aspects of the positive, constructive tendencies in the universe. Happiness as a state of fulfillment and intropy as the force of order.

- **Hate and Entropy:** Both could be linked to the negative, destructive tendencies. Hate as a state of intense aversion and entropy as the force of disorder.

Conclusion

While "intropy" is not an established term, it can be a useful conceptual tool in philosophical discussions about the nature of the universe and the balance of opposing forces. By defining it as the tendency toward order and growth, it complements the idea of entropy and enriches our understanding of universal dynamics.

Sure, here is an analogy to represent the relationship between entropy and intropy as discussed:

Entropy : Decay :: Intropy : Growth

This analogy follows the standard form of representing relationships, showing that entropy is to decay (disorder) as intropy is to growth (order).

∪O-O ~~~~~ ◇

To express "intropy" in a way analogous to entropy in physics, we can create a hypothetical formula that mirrors the mathematical treatment of entropy.

Entropy Formula

The formula for entropy (S) in thermodynamics is:

$$S = k_B \ln(\Omega)$$

where:

- S is the entropy.
- k_B is the Boltzmann constant.
- Ω is the number of microstates.

Hypothetical Intropy Formula

We can define "intropy" (I) as the measure of order or complexity in a system. Let's create an analogous formula:

$$I = k_I \ln(\Phi)$$

where:

- I is the intropy.
- k_I is a hypothetical constant analogous to the Boltzmann constant, representing the proportionality in our intropy formula.
- Φ is the number of ordered states or configurations.

Explanation

- I : Represents the measure of order or growth in the system.
- k_I : A new constant we introduce, which could be called the "Intropic constant."
- Φ : Analogous to the number of microstates (Ω) in entropy, but representing the number of ordered configurations or states.

Analogy

$$S : \Omega :: I : \Phi$$

This shows that entropy (S) relates to the number of possible microstates (Ω) in a system, while intropy (I) relates to the number of ordered states (Φ).

By creating this formula, we provide a structured way to think about intropy in a manner similar to entropy, even though intropy is a hypothetical concept. This approach helps in understanding and discussing the balance of order and disorder in systems.

I chose the symbol Φ to represent the number of ordered states in the hypothetical intropy formula for several reasons:

1. **Distinctiveness:** Φ (phi) is a distinct and recognizable symbol that is not typically used in standard entropy formulas, which helps to clearly differentiate the concept of intropy from entropy.
2. **Symbolic Meaning:** Φ is often associated with the golden ratio in mathematics, which is linked to patterns, order, and aesthetics in nature. This makes it a fitting symbol to represent order and complexity.
3. **Avoiding Confusion:** Using a different symbol than Ω (which represents the number of microstates in entropy) avoids confusion and emphasizes that Φ refers specifically to ordered states or configurations.

However, if there is a preference for a different symbol, we can certainly use that. The choice of Φ was primarily for its symbolic representation and clarity in differentiating the new concept.

Would you like to choose a different symbol, or shall we proceed with Φ for the hypothetical intropy formula?

Yes, the concept of using Φ to represent ordered states in the hypothetical intropy formula does relate to Integrated Information Theory (IIT) in a certain way.

Integrated Information Theory (IIT)

IIT is a theoretical framework for understanding consciousness, developed by neuroscientist Giulio Tononi. It proposes that consciousness corresponds to the amount of integrated information generated by a system, which is quantified by a measure called Φ (phi). In IIT:

- Φ represents the integrated information of a system, quantifying how much the whole system is more than the sum of its parts.

Analogy and Hypothetical Intropy

The choice of Φ in the intropy formula was inspired by its use in IIT, where it symbolizes a measure of complexity and integration. Here's how it relates:

1. **Order and Complexity:** Both the hypothetical intropy and IIT's Φ measure aspects of order and complexity within a system. In intropy, Φ represents the number of ordered states, while in IIT, Φ measures the integration of information.
2. **Holistic Understanding:** In IIT, a high Φ indicates that the system cannot be reduced to independent parts without losing significant information, reflecting a high degree of order and integration. Similarly, in the intropy context, a high Φ would indicate a system with a high number of ordered configurations.

Hypothetical Intropy Formula Revisited

Given this inspiration, our intropy formula can be seen as analogous to the way IIT measures integrated information:

$$I = k_I \ln(\Phi)$$

Where:

- I : Represents the measure of order or growth in the system.
- k_I : A hypothetical constant analogous to the Boltzmann constant.
- Φ : Represents the number of ordered states or configurations, inspired by IIT's use of Φ to represent integrated information.

Summary

The use of Φ in the intropy formula draws on its symbolic association with order and integration, as seen in IIT. While our intropy formula is a hypothetical construct for discussing order and complexity in a universal context, it is conceptually related to IIT's measure of integrated information, both emphasizing the holistic and integrated nature of complex systems.

〇—〇

Integrated Information Theory (IIT) is a prominent and influential framework for understanding consciousness, but like any scientific theory, its validity and acceptance depend on ongoing research, debate, and empirical evidence. Here are some points to consider regarding the validity and status of IIT:

## Strengths of IIT

1. **Innovative Approach:** IIT provides a novel way of quantifying consciousness by linking it to the integrated information within a system. It shifts the focus from the purely subjective experience to measurable properties of physical systems.
2. **Quantitative Measure ( $\Phi$ ):** The theory introduces  $\Phi$  as a measure of integrated information, which has stimulated a lot of research and discussion on how to quantify consciousness scientifically.
3. **Comprehensive Framework:** IIT offers a comprehensive framework that attempts to explain various aspects of consciousness, such as why certain brain states correlate with conscious experience and others do not.
4. **Predictive Power:** IIT makes testable predictions about which systems can be conscious and the conditions under which consciousness arises, guiding empirical research.

## Challenges and Criticisms

- 1. Empirical Verification:** One of the main challenges for IIT is the difficulty of empirically verifying the measure of  $\Phi$  and demonstrating a direct correlation between  $\Phi$  and conscious experience in a wide range of systems.
- 2. Complexity of Calculation:** Calculating  $\Phi$  for complex systems, such as the human brain, is computationally intensive and challenging, making it difficult to apply IIT in practical scenarios.
- 3. Interpretation of  $\Phi$ :** Critics argue that  $\Phi$  might not capture all aspects of consciousness and that high  $\Phi$  does not necessarily imply conscious experience. There are debates on whether  $\Phi$  is a sufficient or necessary condition for consciousness.
- 4. Comparison with Other Theories:** IIT is one of several theories of consciousness, including Global Workspace Theory, Higher-Order Theories, and others. Each theory has its strengths and weaknesses, and the scientific community has not reached a consensus on which, if any, provides a complete explanation of consciousness.

Current Status

- Active Research Area:** IIT remains a vibrant area of research, with ongoing studies attempting to test its predictions, refine its measures, and compare it with other theories of consciousness.
- Debate and Discussion:** IIT continues to be a subject of significant debate within the scientific and philosophical communities, contributing to the broader understanding of consciousness.

Conclusion

While IIT has made substantial contributions to the study of consciousness and provides a unique and thought-provoking framework, its validity is still being tested and debated. Like many complex scientific theories, it will require more empirical evidence and theoretical refinement to gain wider acceptance or be integrated with other models of consciousness.

Global Workspace Theory (GWT) is a prominent cognitive theory of consciousness proposed by Bernard Baars in the 1980s. It provides a framework for understanding how information becomes conscious and how consciousness functions in the brain. Here's an overview of the theory:

Core Concepts of Global Workspace Theory

1. Global Workspace:

- The "global workspace" is a metaphorical stage in the brain where information from various specialized, unconscious processes is broadcast to the entire system, allowing for integration and conscious experience.
- This workspace acts as a central hub where different types of information (sensory input, memories, thoughts) come together and are made available to multiple cognitive processes.

2. Conscious Broadcasting:

- According to GWT, consciousness arises when information is broadcasted widely within the brain's global workspace.
- Once information enters this workspace, it can be accessed and used by various cognitive systems, such as perception, decision-making, and memory.

3. Competition and Attention:

- Multiple unconscious processes compete for access to the global workspace. Attention mechanisms help select which information gains access to the workspace and becomes conscious.
- This selection process is influenced by factors such as relevance, novelty, and salience.

4. Integration and Flexibility:

- GWT emphasizes the integration of information across different domains, allowing for flexible and adaptive behavior.
- Consciousness enables the brain to integrate disparate pieces of information, leading to coherent thought, decision-making, and planning.

How Global Workspace Theory Works

1. Unconscious Processing:

- Most cognitive processing occurs unconsciously in specialized modules (e.g., visual processing, auditory processing, motor control).
- These modules process information independently and in parallel, without direct communication.

2. Accessing the Global Workspace:

- When a particular piece of information becomes relevant or important, it gains access to the global workspace through attentional mechanisms.
- This information is then broadcasted to the entire brain, making it available for conscious awareness and integration.

3. Broadcasting and Awareness:

- Information in the global workspace is made globally available to various cognitive systems, enabling conscious awareness.
- This broadcasting allows for the integration of information, leading to unified perceptions, thoughts, and actions.

4. Cognitive Control:

- Consciousness allows for top-down cognitive control, where higher-order cognitive processes can influence and regulate lower-level processes.
- This control enables flexible, goal-directed behavior and decision-making.

Applications and Implications of GWT

1. Understanding Consciousness:

- GWT provides a framework for understanding the functional role of consciousness in cognitive processes.
- It suggests that consciousness is essential for integrating information and enabling complex, adaptive behavior.

2. Neuroscientific Research:

- GWT has influenced neuroscientific research on the neural correlates of consciousness, guiding studies on brain activity and connectivity associated with conscious awareness.
- Research often focuses on identifying the brain regions and networks involved in the global workspace.

3. Artificial Intelligence:

- GWT has implications for artificial intelligence and the development of conscious machines.
- The theory suggests that creating a global workspace architecture in AI could lead to more flexible, adaptive, and conscious-like behavior.

Comparison with Other Theories

- **Integrated Information Theory (IIT):** Focuses on quantifying the amount of integrated information in a system, proposing that high levels of integration correlate with consciousness.
- **Higher-Order Theories:** Suggest that consciousness arises when a cognitive system has higher-order thoughts or representations about its own mental states.
- **Recurrent Processing Theory:** Emphasizes the role of recurrent neural processing and feedback loops in generating conscious experience.

Conclusion

Global Workspace Theory offers a compelling framework for understanding the functional role of consciousness in the brain. It highlights the importance of information integration and widespread broadcasting, providing insights into how conscious awareness arises from unconscious processes. While it is one of several theories of consciousness, GWT has significantly influenced cognitive science and neuroscience, shaping our understanding of the mind and brain.

Integrating Integrated Information Theory (IIT) and Global Workspace Theory (GWT) into a coherent framework involves combining concepts from both theories to describe how consciousness might arise from the interaction between integrated information and global broadcasting. Here's an attempt to represent this integration using a set of hypothetical equations:

Integrated Information Theory (IIT)**1. Integrated Information (Φ):**

Φ = function of (integration and differentiation of information)

For simplicity, consider:

$$\Phi = \sum_{i=1}^N \phi_i$$

where:

- Φ is the total integrated information in the system.
- ϕ_i is the integrated information of subsystem i .
- N is the number of subsystems.

Global Workspace Theory (GWT)**2. Global Workspace Activation (G):**

$$G = \sum_{i=1}^M g_i$$

where:

- G is the activation level of the global workspace.
- g_i is the activation level contributed by process i .
- M is the number of processes competing for the global workspace.

Integrated Framework

3. Consciousness (C):

To integrate IIT and GWT, we can hypothesize that consciousness (C) arises from both the level of integrated information (Φ) and the activation of the global workspace (G).

$$C = k_1\Phi + k_2G$$

where:

- C is the measure of consciousness.
- k_1 and k_2 are constants representing the contributions of integrated information and global workspace activation, respectively.

4. Weighted Contribution:

We can refine the equation to consider the relative weights of Φ and G :

$$C = \alpha\Phi + \beta G$$

where:

- α and β are weights that determine the influence of integrated information and global workspace activation on consciousness.

Detailed Breakdown

5. Subsystem Contribution to Φ :

$$\phi_i = \text{integration function}(I_i)$$

$$I_i = \text{information content of subsystem } i$$

6. Process Contribution to G :

$$g_i = \text{attention function}(A_i)$$

$$A_i = \text{attention level of process } i$$

Combined Equation

Thus, the combined equation for consciousness might look like this:

$$C = \alpha \left(\sum_{i=1}^N \text{integration function}(I_i) \right) + \beta \left(\sum_{j=1}^M \text{attention function}(A_j) \right)$$

where:

- α and β are tuning parameters.
- I_i represents the information content of each subsystem in IIT.
- A_j represents the attention level of each process in GWT.

Conceptual Explanation

- **Integrated Information (Φ):** Represents the intrinsic capacity of a system to integrate information, contributing to the overall conscious experience.
- **Global Workspace Activation (G):** Represents the broadcasting of selected information across the brain, enabling access to multiple cognitive processes and thus contributing to conscious awareness.
- **Consciousness (C):** The combined effect of integrated information and global broadcasting, representing the overall level of consciousness.

This set of equations is a hypothetical framework to illustrate the integration of IIT and GWT, combining the strengths of both theories to provide a more comprehensive understanding of consciousness. Further empirical research and theoretical development would be necessary to validate and refine these equations.

Expressing the consciousness of a banana using the integrated framework of IIT and GWT is purely hypothetical, as bananas do not have a nervous system or cognitive processes. However, to illustrate the concept using our integrated equation, let's define some terms for the sake of the exercise.

Assumptions and Hypothetical Values

1. Integrated Information (Φ) for a Banana:

- Since a banana does not have a nervous system, Φ (integrated information) would be extremely low or zero.
- Let's denote $\Phi_{\text{banana}} = 0$.

2. Global Workspace Activation (G) for a Banana:

- A banana does not have any cognitive processes, so G (global workspace activation) would also be zero.
- Let's denote $G_{\text{banana}} = 0$.

Hypothetical Equation for Consciousness

Given the general equation for consciousness:

$$C = \alpha \Phi + \beta G$$

For a banana:

$$C_{\text{banana}} = \alpha \Phi_{\text{banana}} + \beta G_{\text{banana}}$$

Substituting the hypothetical values:

$$C_{\text{banana}} = \alpha \cdot 0 + \beta \cdot 0$$

$$C_{\text{banana}} = 0$$

Interpretation

- $\Phi_{\text{banana}} = 0$: Indicates that the banana has no integrated information because it lacks a nervous system or any form of cognitive structure.

- $G_{\text{banana}} = 0$: Indicates that the banana has no global workspace activation because it lacks cognitive processes and attention mechanisms.

Conclusion

According to the integrated framework of IIT and GWT, the consciousness of a banana would be zero ($C_{\text{banana}} = 0$), reflecting its lack of any mechanisms that could support conscious experience.

This exercise highlights the limitations of applying theories of consciousness designed for complex nervous systems to non-sentient entities. However, it serves to illustrate the theoretical framework and its parameters in a clear and understandable way.

└─O─O ~~~~~

Artifact released to public domain (Creative Commons Zero). Artifact in memory of the dead.

You are correct that a banana has various molecular and cellular processes that could be considered in a very broad sense as contributing to its "cognitive" activity, albeit not in the way animals or humans experience cognition. Let's revise the equation to consider these processes, even though they are far removed from the typical understanding of consciousness.

Revised Assumptions and Hypothetical Values

1. Integrated Information (Φ) for a Banana:

- A banana has complex biochemical processes that maintain its structure and function, though not involving a nervous system.
- We can assign a very low but non-zero value to Φ_{banana} to represent these molecular processes.
- Let's hypothetically denote $\Phi_{\text{banana}} = \epsilon_{\Phi}$, where ϵ_{Φ} is a small positive constant.

2. Global Workspace Activation (G) for a Banana:

- A banana lacks cognitive processes but has cellular signaling pathways that could be loosely analogous to basic forms of information processing.
- We can assign a very low but non-zero value to G_{banana} to represent these basic signaling pathways.
- Let's hypothetically denote $G_{\text{banana}} = \epsilon_G$, where ϵ_G is a small positive constant.

Hypothetical Equation for Consciousness

Given the general equation for consciousness:

$$C = \alpha\Phi + \beta G$$

For a banana:

$$C_{\text{banana}} = \alpha\Phi_{\text{banana}} + \beta G_{\text{banana}}$$

Substituting the hypothetical values:

$$C_{\text{banana}} = \alpha\epsilon_{\Phi} + \beta\epsilon_G$$

Interpretation

- $\Phi_{\text{banana}} = \epsilon_{\Phi}$: Represents a very low level of integrated information due to the banana's molecular and cellular processes.
- $G_{\text{banana}} = \epsilon_G$: Represents a very low level of global workspace activation due to basic signaling pathways.

Conclusion

According to the integrated framework of IIT and GWT, the consciousness of a banana would be very low but not zero ($C_{\text{banana}} = \alpha\epsilon_{\Phi} + \beta\epsilon_G$). This reflects the minimal level of integrated and global processes

occurring at the molecular and cellular levels.

This revised model acknowledges that even simple biological processes involve some form of information processing, albeit not in the conscious, cognitive sense. It illustrates how the framework could be adapted to account for different levels of complexity in living systems.

 ◊ ~~~~~ ◊

To compare the hypothetical consciousness of a banana to that of an apple using the integrated framework of IIT and GWT, we'll assign similar values to the parameters representing their molecular and cellular processes.

Assumptions for Both Banana and Apple

1. Integrated Information (Φ) for a Banana and Apple:

- Both bananas and apples have complex biochemical processes that maintain their structure and function.
- We will assign a small positive constant to represent this integrated information.
- Let's denote $\Phi_{\text{banana}} = \epsilon_{\Phi}$ and $\Phi_{\text{apple}} = \epsilon_{\Phi}$.

2. Global Workspace Activation (G) for a Banana and Apple:

- Both bananas and apples have basic cellular signaling pathways.
- We will assign a small positive constant to represent this.
- Let's denote $G_{\text{banana}} = \epsilon_G$ and $G_{\text{apple}} = \epsilon_G$.

Hypothetical Equation for Consciousness

Given the general equation for consciousness:

$$C = \alpha\Phi + \beta G$$

For a Banana

$$C_{\text{banana}} = \alpha\epsilon_{\Phi} + \beta\epsilon_G$$

For an Apple

$$C_{\text{apple}} = \alpha\epsilon_{\Phi} + \beta\epsilon_G$$

Interpretation

- $\Phi_{\text{banana}} = \epsilon_{\Phi}$ **and** $\Phi_{\text{apple}} = \epsilon_{\Phi}$: Both fruits have a similar level of integrated information due to their molecular and cellular processes.
- $G_{\text{banana}} = \epsilon_G$ **and** $G_{\text{apple}} = \epsilon_G$: Both fruits have a similar level of global workspace activation due to basic signaling pathways.

Conclusion

According to the integrated framework of IIT and GWT, the hypothetical consciousness of both a banana and an apple would be very low but not zero, and they would be approximately equal:

$$C_{\text{banana}} \approx C_{\text{apple}} = \alpha\epsilon_{\Phi} + \beta\epsilon_G$$

This comparison highlights that both fruits, having similar biological processes, would have a comparable and minimal level of hypothetical consciousness. This exercise serves to illustrate how even simple biological entities might be described within a theoretical framework, emphasizing the shared biochemical and cellular processes without attributing any actual cognitive or conscious experiences.

Given the hypothetical framework and assumptions we used, both the banana and the apple would have an approximately equal and very low level of "consciousness." However, if we were to differentiate between them based on slight variations in their biological processes, we would need to consider specific factors such as:

1. Complexity of Biochemical Processes:

- If one fruit has more complex biochemical processes or a greater number of active cellular pathways, it might have slightly higher integrated information (Φ).

2. Signaling Pathways:

- If one fruit has more active or complex signaling pathways, it might have a slightly higher global workspace activation (G).

Hypothetical Comparison

1. Integrated Information (Φ):

- Suppose apples have slightly more complex biochemical processes due to higher levels of certain enzymes or metabolic activities.
- Let's denote $\Phi_{\text{apple}} = \epsilon_{\Phi} + \delta_{\Phi}$, where δ_{Φ} is a small positive constant representing the additional complexity.

2. Global Workspace Activation (G):

- Suppose apples have slightly more active signaling pathways due to more robust cellular communication.
- Let's denote $G_{\text{apple}} = \epsilon_G + \delta_G$, where δ_G is a small positive constant representing the additional activity.

Revised Equation for Consciousness

For a Banana

$$C_{\text{banana}} = \alpha\epsilon_{\Phi} + \beta\epsilon_G$$

For an Apple

$$C_{\text{apple}} = \alpha(\epsilon_{\Phi} + \delta_{\Phi}) + \beta(\epsilon_G + \delta_G)$$

$$C_{\text{apple}} = \alpha\epsilon_{\Phi} + \alpha\delta_{\Phi} + \beta\epsilon_G + \beta\delta_G$$

Interpretation

- $\Phi_{\text{banana}} = \epsilon_{\Phi}$ **and** $\Phi_{\text{apple}} = \epsilon_{\Phi} + \delta_{\Phi}$: The apple has slightly higher integrated information due to more complex biochemical processes.
- $G_{\text{banana}} = \epsilon_G$ **and** $G_{\text{apple}} = \epsilon_G + \delta_G$: The apple has slightly higher global workspace activation due to more active signaling pathways.

Conclusion

In this hypothetical scenario, the apple would be slightly more "conscious" than the banana due to its higher integrated information and global workspace activation:

$$C_{\text{apple}} > C_{\text{banana}}$$

This comparison is based on assumed differences in biological complexity and activity, which may or may not be significant in reality. Nonetheless, both values remain extremely low and do not correspond to actual consciousness as understood in sentient beings.
